

The Retriever Believer

Monthly Newsletter of the Puget Sound Labrador Retriever Association
Volume 35, Number 9, September 2019

Adieu Summer, Hello Fall!

Happy September! I love this time of year. The crispness of the air! The geese flying in the "V."

Thank you to all the PSLRA members that consistently volunteer at our events. The Specialties were a huge success. I personally received many comments on the show's location, the friendliness of our club, and my favorite was being thanked for the weather. The atmosphere was festive and warm—dinner at the beach, great music, and good friends. What a wonderful night. Thank you to Angela Rogalla and Linda Maffett and the many others that were involved with the show committee.

The end of August brought our Fall HRT. As always it ran smoothly, even though we were at different locations this year. Glad to hear we will be returning to The Retriever Grounds next spring. Thank you to Liz Gibson, Cindy Olson, Jim Olson, and their HRT committee for the outstanding effort!

PSLRA's next event is the Health Clinic, Sunday, September 22nd, at River Dog in Issaquah.. Laura Steward is the chairperson taking over the duties from Mary Jan Sarbaugh. If you are planning on attending please be sure and get your information to Laura prior to the 22nd.

Good luck and best wishes to all especially those traveling to the LRC National events.

Secretary's Minutes

Becky, Marcy, Brenda, Jan, Jill, Jim, Teri Sato, Cindy start at 6:38

Specialty report, Angela:

Went well, cleared about \$4,000 stud auction, \$700 Judy painting.

Two year contract with Baray includes good discount. We hesitate to switch at this point.

Social media is helpful for publicity. Entries up a bit.

Moved and seconded that the specialty committee is responsible for the choice of what superintendent we use.

Seven board members here and vote is unanimous.

Fun conformation day. Email chairs and ask for list of volunteers.

Committee reports:

- Tracking –Franna looking into TDX, confirmed Richland parks. Local judges

Fun Field Day. May be able to do one in March because SKC has moved.

Fall Hunt Test: Jim and Cindy. Its' going to be at Cherry Valley. (my connection dropped so I missed some of this). Going to work hard to get more judges for next year.

Spring agility trial. No info yet.

Jacks dog riverdog

Banquet, working out how to pay for dinners.

Judges selection committee: Beth Wilkerson for Puyallup, Angela Rogalla for Lynden, sweeps at supported entries. Moved and seconded, vote approved by board.

Health donations: sending \$3,000 to U of WI for TVD and CCL research. (send email to MJ)

Trophy discussion

Medallions have been found.

Jr Scholarship. Someone applied after the May 31 deadline. More info needed.

All around Labrador—

Nina was always in charge and we would put an ad in the National Catalog. We need someone to do this by the 26th. Jan volunteered and did a great job on short notice.

Nominating committee: need volunteers by November

Glasses made to sell at the specialty. Also have a round robin/progressive dinner at the camp sites thurs night. Call it a progressive social hour. Profit from the sales would be for juniors.

Rethink guidelines for meeting to make it easier for people to be on the board.

Adjourn at 7:55

PSLRA Supports Research

PSLRA has, once again, shown our commitment to bettering our breed by making a substantial financial contribution of \$3,000 to the Cranial Cruciate Ligament and Laryngeal Paralysis studies being conducted by the University of Wisconsin School of Veterinary Medicine Genetics Laboratory.

Dogs are being sought for this important research.

Please see flyers in this newsletter for information.

UW Veterinary Care
UNIVERSITY OF WISCONSIN-MADISON

WANTED

Dogs with Laryngeal Paralysis, Senior Labrador Retrievers and Golden Retrievers

The Study

Laryngeal paralysis is a disease that most commonly affects older (9-13+ years) Labrador Retrievers and Golden Retrievers, although other breeds can also be affected. The condition results in dogs having difficulty with breathing and mobility, which can become life-threatening.

Laryngeal paralysis is most commonly the result of a generalized progressive neurologic disease, meaning that the condition affects many nerves in the body, not just the nerve associated with the larynx (voice box).

Although we now know the condition is genetic (inherited), the specific gene mutation(s) is not known. This study focuses on understanding the genetic mutation(s) that results in laryngeal paralysis and the changes nerves undergo as a result of the disease.

Who Qualifies

There are 2 groups of dogs that currently qualify for the study:

- Any dog with laryngeal paralysis
- Any pure-bred Labrador Retriever or Golden Retriever over 12.5 years of age

What Happens

Dogs Who Can Visit Madison Wisconsin

Typically one visit to UW Veterinary Care, and no sedation is required. All patients receive a free neurologic examination from a board-certified small animal neurologist or surgeon. Blood will be collected for DNA analysis.

Owners are asked to provide pedigree or registration papers, if available.

Dogs without evidence of laryngeal paralysis may be asked to return for repeat examinations every 6-12 months, to assure they remain disease free.

Dogs Who Don't Live Near Madison Wisconsin

We are looking for dogs from all over the US and Canada to help us with this study! If you would like to participate, we can send you a package with saliva swabs for DNA collection, a permission form and a questionnaire about your dog's medical history, along with packaging to send material back to us.

Why Participate

This work is expected to result in the development of a genetic test for laryngeal paralysis. This test would be available for use by any veterinarian. A blood or saliva sample taken in puppyhood would identify dogs at risk for laryngeal paralysis. This will provide information for purchasing and breeding decisions and allow medical intervention to slow disease progression. Importantly, the results of this research in dogs are expected to help understand and inform treatment of human patients with a similar genetic disease.

More Information

If you are interested in participating in this study, please contact:

WANTED

Labrador Retrievers and Rottweilers for Study of Cruciate Rupture

The Study

The cranial cruciate ligament, also known as the ACL, is a major stabilizing structure in the knee of dogs and people. Non-contact cruciate rupture (rupture not associated with any known trauma) occurs in about 6% of Labrador Retrievers and 9% of Rottweilers. It is responsible for 20% of canine lameness and burdens U.S. pet owners with at least \$1 billion in healthcare costs each year. It is accepted that a majority of ruptures are not associated with trauma, but the reason dogs rupture their ligament is not known. It is likely that part of the risk that an animal has for developing this condition is genetic (inherited). We are working to determine the genetic contributions to the development of cruciate ligament rupture in dogs.

Who Qualifies

There are 2 groups of dogs that currently qualify for the study:

- Labrador Retrievers and Rottweilers with knee problems due to a torn cruciate ligament (torn ACL)
- Any Labrador Retriever or Rottweiler over 8 years of age

What Happens

This study requires one visit to UW Veterinary Care and no sedation is required. All patients receive a free orthopedic examination from a

board-certified surgeon. Free radiographs (x-rays) are taken of both knees. Blood is collected for DNA analysis. Owners are asked to provide pedigree or registration papers, if available.

Why Participate

This work is expected to result in the development of a genetic test for cruciate ligament rupture in dogs. This test would be available for use by any veterinarian. A blood or saliva sample taken in puppyhood would identify dogs at risk for non-contact cruciate rupture. This will provide information for purchasing and breeding decisions and allow medical intervention to slow disease progression.

Moreover, it has long been established that dogs and humans share a similar profile of diseases, and cruciate rupture is no exception. Evidence exists for genetic contribution to ACL (anterior cruciate ligament) rupture in humans. Therefore, it is possible that this research will contribute to human as well as veterinary medical knowledge. There is no charge to participate in this study.

"Madison"

Madison rocked the Sporting Dog Spectacular in BC, July 19 & 20, 2019. Saturday she was Best of Breed from the FIELD DOG CLASS!! under Judge Raymond Yurick. She went on to win Best Field Retriever in Specialty And a Group 4 under Judge Pluis Davern. Sunday, she finished the weekend with a Group 3 under breed and group Judge Lynda Saranchuk.

She continued the fun at PSLRA August 3 & 4! Saturday, she qualified in both Novice B obedience trials under Judge Don Rennick. We tried for High In Trial, but no such luck. However, she did win Highest Scoring Dog Bred By Exhibitor, Highest Scoring AKC Champion of Record, Highest Scoring AKC Champion of Record with a Hunting Title and also won the Perpetual trophy for Highest Scoring AKC Champion with a Hunting Title. She won Best All Around under Judge Kimberly Nowak on Saturday and then won Best Hunting Retriever in Specialty under Judge Nancy Talbott.

The Overachiever Retriever has been BUSY! At the end of June, we were able to fit in a single day of showing at the UKC Washington Classic where she earned a BOB and as well as a first place in Novice Obedience C and a fourth place in Rally Obedience 2B with a score of 93. She only needs one more leg to complete her URO2 title. The qualifying scores in the performance events, paired with the breed win earned Brach her third Total Dog award, which now qualifies her for the Total Dog competition at Premier 2020! She'd returned from her BISS Retriever Specialty win there just weeks prior and has already qualified to return. In addition, I just learned that Brach is in the UKC Top Ten standings and tied for seventh in breed points for 2019. It may not hold, but it is exciting to see her name on the list.

Next, we supported our club and showed in Rally and Obedience at the PSLRA Specialty show. Brach won both of her Novice B Obedience classes and placed second in both Rally Excellent B classes for her first two RE legs. To this date, this dog has not failed to qualify in any event in which she competes. Sometimes the scores may be less than ideal, but she gives it her all and comes through for that green ribbon every time! I. LOVE. THIS. DOG!

Finally, we are trying our hands (paws) at something new—FastCATs! Brach ran her first 100 yard dash at the Sannamish Kennel Club FastCAT competition in August. While she was fairly new to a lure, she quickly figured out the game and bettered her times with each run, clocking in at just over 21mph. Her average speed ranks her at 98th nationally, so we are setting our sights higher for upcoming events—GOALS, Brach! Goals!

What's next? Her weight pull harness is lying in wait for the next opportunity to try that event...wish us luck!

- **5 Year Old – Chocolate Female**
- **Name: Penny**
- **General Information:** Penny, is a beautiful, sweet natured dog. She is dark chocolate, stands around 23" tall, and weighs 75 pounds. She loves water and is very athletic, but her best quality is her perfect lab temperament. She is very mellow, extremely smart, and very intuitive. All this makes her a joy to be around. We call her Perfect Penny because she has never done a thing wrong!
- We love Penny very much and wish for her a family to love and grow old with, so she is now available for adoption to the right home. She would make an excellent therapy dog because of her quiet, kind, & intuitive mature.
- Penny is obedience trained and would require No extra training to become a therapy dog.
